Recitation week 12

Presentations, videos, questions due 11/5 (Thursday) at 3pm

Change this week: No video. No questions/answers due. Instead there will be a brightspace where you will (in a couple of sentences explain the copyright issue you found). The quiz will be open on 11/5 from 3pm to 6pm. also, you don't need to do the ACM ethics slide this week.

Each of you in your team is to prepare a presentation (must have at least 1 title slide + 4 slides + 1 references slide) for the following topic:

An example of a copyright issue due to computer technology

This is a broad topic to give you flexibility in creating your answer/presentation. If you have created a presentation on something fitting this topic before, you must find a different topic. There are so many that I know you can find another one.

Your presentation must have facts from others, not just your opinion. You must cite where these facts came from.

Post your presentation file in Week11 recitation in the assignments folder of Brightspace. It must be a title slide, 4 slides of content and 1 references slide. It must be there by 3pm on Thursday, 11/5.

We will still have student presentations on 11/5.

Points:

Presentation (presentation grade) – 100 points:

20 points – content is in support of the topic above

10 – had at least 4 slides + 1 title slide + 1 reference slide + 1 slide showing which ACM ethics principles that this example violates

25 points – content is not just your opinion – the author did research and did not just provide their own opinion. Put a mark ([1], etc) on the cited work/line that links to your references in your final slide.

10 points – must cite where you got your information from – that is not your own opinion and must state when it is your opinion – used proper citing (MLA, APA, etc). It must be in the reference slide with the references numbered to link to the places in the presentation where you use the information.

If you do the recitation this week, you get 45 points free.

20 points (discussion grade) for taking the brightspace quiz and answering the question.
