Recitation week 7

Presentations, videos, questions due 9/29 (Tuesday) at 3pm

Answers to questions due 10/3 (Saturday) at 11pm – you must answer 2 questions for each team member to equal 12-14 answers.

Each of you in your team is to prepare a presentation (must have at least 1 title slide + 4 slides + 1 slide showing which ACM ethics principles this example violates + 1 references slide) for the following topic:

Example of an ethical issue with facial recognition with AI

This is a broad topic to give you flexibility in creating your answer/presentation. If you have created a presentation on something fitting this topic before, you must find a different topic. There are so many that I know you can find another one.

Your presentation must have facts from others, not just your opinion. You must cite where these facts came from.

You will make a video of you giving your presentation. You can use techsmith relay, zoom, or any other method that you feel comfortable with. Your video needs to be around 4 minutes long.

Place your video in your teams area. Make sure the name of the file includes your name in it. (Example: mary_cummings_robot_ethics.mp4). This file needs to be in your team area by Tuesday, 9/22 at 3pm.

Post your presentation file in Week4 recitation in the assignments folder of Brightspace. It must be a title slide, 4 slides of content and 1 references slide.

You will put 3 questions related to your video presentation in your teams chat area (also by Tuesday, 9/22 at 3pm). These need to be questions that will give a thoughtful response. (Can't be "Did you like the presentation?"). Some examples: Provide one thing you did not agree you with in the presentation? Why? (can do the same thing for agree) OR Compare your example to mine. How are they similar? OR What is my example important to the future of Computer Science?.)

If this is your week to present in class, you only have to create the presentation file and put in brightspace assignments folder by the same due date. Then I will display it for your presentation in class. You do not have to create the questions or upload the video for your class presentation week.

Points:

Presentation (presentation grade) – 100 points:

20 points – content is in support of the topic above

10 points – video is at least 4 minutes

10 – had at least 4 slides + 1 title slide + 1 reference slide + 1 slide showing which ACM ethics principles that this example violates

25 points – content is not just your opinion – the author did research and did not just provide their own opinion. Put a mark ([1], etc) on the cited work/line that links to your references in your final slide.

10 points – must cite where you got your information from – that is not your own opinion and must state when it is your opinion – used proper citing (MLA, APA, etc). It must be in the reference slide with the references numbered to link to the places in the presentation where you use the information.

25 points – put 3 thought provoking questions in your teams area for your presentation

Answering the questions (discussion grade) – 20 points:

6 points – answered 2 questions

8 points – gave thought provoking answers

6 points – length of answer was around 4 lines.
